

<b>Document:</b>	<b>Environmental Policy</b>		
Approved By:	Managing Director: Fiacre Creegan		1 of 1

## Environmental Policy:

Jamestown is involved in the manufacture of plate girders, box girders, cellular beams, bridge beams and heavy fabricated sections. We also provide a steel processing service to the engineering, manufacturing and steel fabrication sectors. We offer top quality, cost effective services and products that meet the needs and expectations of our customer in all respects of quality, cost, performance, safety and reliability.

We recognise that our activities may have negative environmental impacts if not managed correctly, therefore it is our responsibility to manage these impacts through responsible environmental management and effective control measures. Protecting our shared environment is of fundamental importance to Jamestown manufacturing, as it is to our employees, customers and other stakeholders.

It is the policy of Jamestown Manufacturing to operate an environmental management system in accordance with ISO 14001:2015. To support this common goal, we will:

- Conduct our activities in an environmentally responsible manner and in compliance with all applicable legal requirements and company policies.
- Continually improve the environmental performance of our activities and processes by setting and reviewing objectives and targets related to significant environmental risks and putting into effect programmes to reduce those risks.
- Prevent negative environmental impacts through a system of operational controls that include communication, written instructions and appropriate training.
- Promote environmental awareness and make this policy available to all staff, contractors and all interested stakeholders.
- Reduce, reuse and recycle waste as far as reasonably practicable.
- To fully understand the business risk of poorly controlling environmental impacts and their associated ramifications.
- To ensure that environmental protection and the prevention of pollution are part of all decisions, policies, activities, products and services.
- To, as far as reasonably practicable, ensure that Jamestown Manufacturing are not inadvertently impacting the environment in a negative manner resulting from the operations of sub-contractors or suppliers.

It is part of the companies training programme that this policy is understood, implemented and maintained at all levels in the organisation. This policy statement will be reviewed on a regular basis, at least annually to confirm its continuing suitability in assisting with the achievement of the company's objectives.
